""Radiators" Then and Now

Looks at how communication has evolved from the early nineteenth century to today, discussing changes in how people keep in touch, tell stories, and share knowledge.

PROUD AMERICANS

One of the greatest American singers and actresses of her generation looks back on a magical and turbulent life spanning a half century of theatrical history from the golden age of the Broadway musical to the present day. A legend of the American theater, Barbara Cook burst upon the scene to become Broadway’s leading ingénue in roles such as Cunégonde in Leonard Bernstein’s Candide, Amalia Balash in Jerry Bock’s She Loves Me, and her career-defining, Tony-winning role as the original Marian the librarian in Meredith Willson’s The Music Man. But in the late 1960s, Barbara’s extraordinary talent onstage was threatened by
debilitating depression and alcoholism that forced her to step away from the limelight and out of the public life. Emerging from the shadows in the early 1970s, Barbara reinvented herself as the country's leading concert and cabaret artist, performing the songs of Stephen Sondheim and other masters, while establishing a reputation as one of the greatest and most acclaimed interpreters of the American songbook. Taking us deep into her life and career, from her childhood in the South to the Great White Way, Then and Now candidly and poignantly describes both her personal difficulties and the legendary triumphs, detailing the extraordinary working relationships she shared with many of the key composers, musicians, actors and performers of the late twentieth century, among them Sondheim, Leonard Bernstein, Elaine Stritch, and Robert Preston. Hailed by the Financial Times of London as "the greatest singer in the world", but preferring to think of herself as "a work in progress", Barbara Cook here delivers a powerful, personal tale of pain and triumph, as straight forward, unflinchingly honest, and open hearted as her singing.

On Folkways and Mores
The bestselling author and prominent New Testament scholar draws parallels between 1st-century Roman Empire and 21st-century United States, showing how the radical messages of Jesus and Paul can lead us to peace today. Using the tools of expert biblical scholarship and a keen eye for current events, bestselling author John Dominic Crossan deftly presents the tensions exhibited in the Bible between political power and God’s justice. Through the revolutionary messages of Jesus and Paul, Crossan reveals what the Bible has to say about land and economy, violence and retribution, justice and peace, and ultimately, redemption. He examines the meaning of “kingdom of God” prophesized by Jesus, and the equality recommended to Paul by his churches, contrasting these messages of peace against the misinterpreted apocalyptic vision from the book of Revelations, that has been co-opted by modern right-wing theologians and televangelists to justify the United State’s military actions in the Middle East.

**Now and then**

I have often heard people express their wish that someone who has died would return to us and relate what the life-death-rebirth experience is really like. Well, someone has! This is exactly what Beethoven does in my third novel, *Beethoven, Then and Now*. Like Beethoven, each one of us is the proud possessor of a human soul. This clearly defined object is none other than our very own spiritual subelectron. Our physical hulk is only a pile of ashes; but our soul (spiritual subelectron) is unique, eternal, indestructible. Because of its high vibrations, Beethovens soul is immediately attracted to the third subelectron ring of our First-Second-Order universe. Here it awaits rebirth via fusion with the spiritual subelectron of a Major-Order being within our Second-Order-Major universe. Paul Rezler (age seventeen) is the fortunate recipient of this unbelievable prize. He had awakened to the day at hand with his usual zero interest in music. Now (1827 Earth-time) he is the greatest Earth- musician yet to live. Try as Beethoven does, he cannot adjust to the Second-Order reality of corporate composers, not even to being the absolute leader of the Beethoven Corporation. He must be entirely on his own-- a single man vs. the world! Counselor Robinson does his best in selecting a Subsidiary culture which contains a Vienna as close as possible to the one which Beethoven had left behind upon his Earthly death. Within a month, our hero makes his translation and enjoys living where theres not the trace of anything resembling a musical corporation. Sketches for new third-period works begin to flow: a piano sonata, a string quartet, a piano trio, a violin concerto, even some encouraging vibrations of Symphony 10. A handful of piano and violin students emerges, including an exceptional young lady named Anna Rosecranz, who is already a master of these instruments. Her musicianship is so strong that they soon fall in love and are married. How they enjoy performing concerts together! In time, as Beethoven works at his composers desk, she starts peering over his shoulder. She begs him for lessons in composition. He replies, I compose, and AM NOT a teacher of composition! This declaration does not frighten her away. As Beethoven fumbles and bumbles his way from sketchbook to finished score, Anna carefully watches each step of the process. Her comments are invaluable: Use a pedal-point here. Not so dissonant a chord. Pure melody would fit here. Please, not so sustained. Too many notes in the melody. Avoid more of this rhythm. Two-voice counterpoint would do. Too much for the brass here. This use of strings is perfect. Thanks to Anna, Beethoven accomplishes the impossible. He realizes that he works far better with her help than without it. He now loves to share the very process which only yesterday had demanded his total aloofness. As if by magic, he is now prepared to return to Major-Order life as managing partner in charge of the Beethoven Corporation. But considering all that Anna has done for him, he cannot now simply go his own way. As a Subsidiary being, her lifespan is a mere 100 years, compared to his Second-Order-Major span of 1000 years. Being happily married, he plans to share life for the balance of her days. But Fate has his own plan for their lives. After all their years of loving and sharing, Anna is killed in an automobile accident. When Beethoven returns to the Major Order, a super surprise awaits him. There stands Anna Rosecranz, a full Major-Second-Order being, with whom he can share the rest of their 1000 years in joyful creative activity. His first question: On Earth, who were you, my dear? Her reply causes our hero to faint for the second time in his entire Second-Order life!

Jan Serr is a photographer who is a painter and a painter who is a photographer. In this book she has created a body of work focused on color and composition, with no regard for traditional photography or painting. Then & Now is a book of painterly photographs. All of which is one of the reasons she is drawn to China and India. (Then & Now: China Photographs is published simultaneously with Smoke & Mirrors: India Photographs.) In both cultures there is a continuity of art and design, content and form, without the false dichotomies that divide and unfortunately permeate Western thinking, values, and practices. In China and India, the past is perpetually present. Serr worked on every aspect of the book—image, composition, typography, paper, and binding. Then & Now is a portfolio of photographs where the book itself is a primary form of art.
Buddy Remembers - Then and Now

William Graham Sumner is remembered primarily as an opponent of government intervention in social and economic issues. Focusing on Folkways (1906), this book examines Sumner's fundamental work as a comparative ethnographer with an appreciation for the rules and rituals that regulate everyday behavior. In Folkways, Sumner developed classifications and an array of sociological concepts that continue to influence the discipline today. This new book presents key excerpts from Folkways as well as three of Sumner's other classic essays. It also includes five original essays by contemporary authorities that explain and explore Sumner's importance and influence. By linking Sumner's work to contemporary research about social control, the sociology of law, and sociological theory, these new essays confirm his status as a foundational thinker in the field. Sumner offers an elegant conceptual schema with which to analyze the moral codes of in- and out-groups. His extensive use of comparative anthropological data demonstrates a qualitative methodology that can easily be applied to the analysis of contemporary American society. This volume includes contributions by Jonathan B. Imber, Howard G. Schneiderman, and A. Javier Treviño.

What becomes of ballet dancers when they finally leave the stage, when their last curtain falls? Maja Langsdorff, journalist, writer and a former ballet dancer, interviewed 27 former dancers and recorded their life stories from their first ballet steps to their lives after dance. At the time of their interviews they were between 21 and 62 years old, their careers had ended from three months to 34 years ago. Dancers give a lot, if not everything, in the performances. They live their lives in the limelight. In ballet, profession and calling are united: passion and suffering are often close to each other. For most dancers, their time is up at thirty, thirty-five. They disappear from view. One doesn't hear anything about them anymore; as if they were swallowed up by the earth. This book investigates their fates. These short biographies show what formed them, what moved them, what influenced them. And the portraits leave no doubt, that dancers are special people; even if they no longer dance.
